### Fighting Global COVID-19 Together

The ongoing COVID-19 outbreak has the potential to impact every healthcare system across the globe. While the situation in China appears to be reaching a turning point, the World Health Organization (WHO) recently characterizes COVID-19 as a pandemic at the global level. As of April 7<sup>th</sup>, 1,279,722 confirmed, 72,614 deaths, 205 countries/territories/areas have been reported\* globally. The world must unite together and spare no effort to contain the virus. During this webcast, leading global experts on COVID-19 will share and discuss the latest scientific insights regarding COVID-19 disease development, as well as their clinical experience in treating COVID-19 patients.
